SUMMARY

Data Analyst with 5+ years of experience leveraging tools like Python, SQL, Excel, Tableau, and Power BI to deliver actionable insights across diverse datasets. Skilled in statistical analysis, data visualization, and building automated reporting solutions that drive business decisions. Proven ability to quickly learn new technologies, adapt to complex challenges, and communicate findings to both technical and non-technical stakeholders. Passionate about continuous learning and innovation—view portfolio at daniel-byrd.github.io/Portfolio-DB

SKILLS

- **Technical Skills:** Python, R, SQL, Power BI, Looker Studio, Microsoft Office, SSRS
- **Power Skills:** Multi-Tasking, Time Management, Presentation, Problem-Solving, Communication, Troubleshooting
- **Certifications:** IBM Data Analyst

EXPERIENCE

Pomeroy Technologies

January 2020 – October 2023

Service Desk Analyst

- Resolved over 10,000+ technical issues for UMB Bank, boosting client satisfaction and maintaining high SLA compliance.
- Developed an incident documentation tool that automated work note creation, reducing ticket resolution time by 15%.
- Provided technical support for operating systems, proprietary software, and custom applications.

Budget Ninjas LLC

July 2018 – October 2019

Computer Programmer Intern

- Assisted in modernizing company website using ASP.NET and C#, enhancing user interface and backend efficiency
- Designed and implemented SSRS reports to streamline operational data access and improve decision-making

EDUCATION

Greenville Technical College

2019

Associates in Applied Science; Major in Computer Technology

Awards: Dean's List (multiple), President's List (multiple)

PROJECTS

Performance and Available Analysis (Elden Ring Item Analysis)

2024

- Goal was to create a detailed dashboard documenting key information of several items found in the game Elden Ring, information was web scraped and then compiled into a dashboard in Power BI
- Created 6 detailed and organized pages, each page focusing on a key section of information and constructed several charts and graphs using information further gathered via DAX
 - Achievement: Was able to identify key insights that would have been missed without detailed analysis, identifying patterns not covered before by the community

Community Involvement Analysis (TF2 Map Analysis)

2024

- Goal was to create a detailed dashboard studying various aspects of the maps found in the game Team Fortress 2
- Created a system that allowed me to web scrape data directly from the official wiki, which would then be parsed into a dataframe inserting other data gathered from both external sources and manual documentation
- Created several interactive and scalable graphs detailing differences in map size and community involvement
